

Public Library HVAC Renovation

Project Description:

This project was to replace the chilled water and boiler system at the Public Library with a Variable Refrigerant Flow System (VRF) which eliminates maintenance requirements for multiple water systems and eliminates costly water treatment services that the Chillers and Boilers required. This system also has been shown to provide the Library with energy savings on their electricity bills in comparison with the previous system.

Design Team:
DAPEngineering

Total Project Cost:
\$348,992

Contractor Team:
Morton Mechanical

Completion Date:
August 2014

Carolyn Bowers
County Mayor

Nick Powell, P.E.
County Engineer
